Quik-Roll™ Security Door

Securing important documents or patient information to meet HIPAA compliance has never been easier.

Quik-Roll Security Door from Aurora can help meet your needs.

The locking Quik-Roll installs on new Aurora Shelving, or retrofits to existing Aurora Shelving within minutes. Your files stay in place, no need to unload. You lose no filing space. Downtime is measured in minutes.

Lock the unit with a single push-button keyed lock. Unlock the system and the counterbalanced door gently springs up. How's that for quick security?

Quik-Roll can also provide security for Aurora Mobile applications, both new and existing.

Quik-Roll™ Security Door

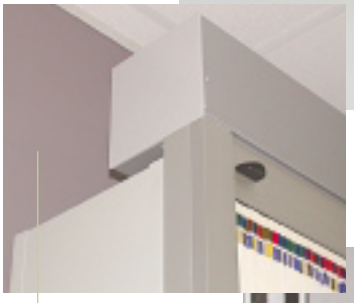
Consult your Dealer Representative.

Push-button key locking for greater security.



A side closure panel is available. (See front photo.)

A 1¾" channel on the side frame allows for file clearance.

Installation. Simply clip the guide rails to the shelving edge and lightly tighten the screws.Next,position the housing box at the top of the unit by sliding it into the rails,then tighten the screws on the clips.

From open to closed to locked... simple as 1-2-3

Housing and Door Design. Quik-Roll's housing is pre-assembled and contains a counterbalanced spring for easy lifting. This design also acts as a brake to prevent rapid closing speeds. Lightweight metal slats combine a polyurethane foam core with an aluminum cover to create a modern and finished look when the door is closed.
