Aurora Mobile Side-To-Side

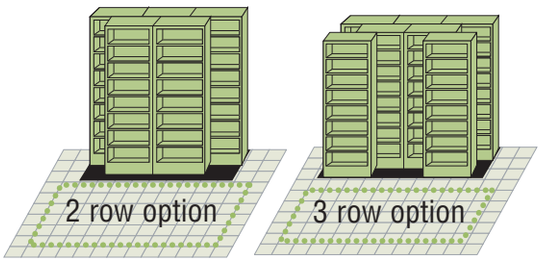
Aurora Mobile Side-To-Side puts two or three rows of storage at your fingertips.

Also available on:

GSA Contract Holder
Contract GS-25F-0084M

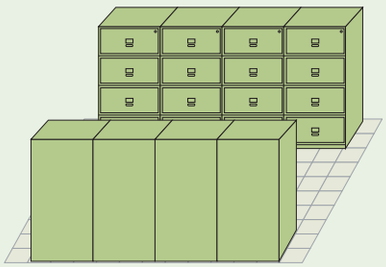
Aurora Side-To-Side is a compact lateral mobile storage system that optimizes floor space. Move front carriages left or right to access carriages in the back row.

- Modular, lateral storage
- 2 or 3 row options
- 7-tier or 8-tier heights
- Letter or Legal Sizes
- 36", 42", and 48" width shelving
- 2-7 carriage lengths
- Reference Shelf accessory



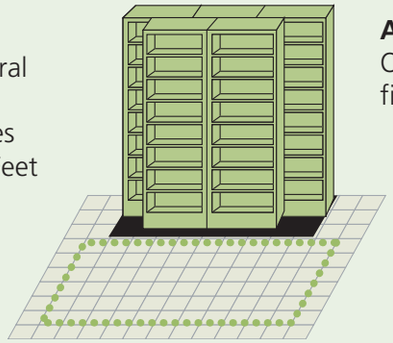
Space Planning

Increase Storage in the Same Space



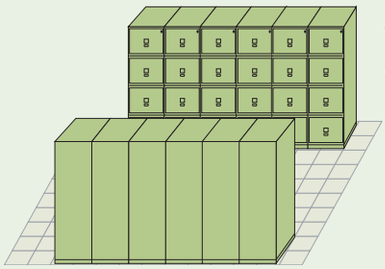
Lateral Cabinets
Eight 48" 4-drawer lateral cabinets provide:

- 1,472 Filing Inches
- Use 128 Square Feet of Floor Space



Aurora Side to Side
One Aurora Side-to-Side unit with five 8-tier carriages provides:

- 1,360 Filing Inches
- Uses only 21.6 Square Feet of Floor Space
- Saves Space, or Adds More Storage



Vertical Cabinets
Twelve 4-drawer file cabinets provide:

- 1,200 Filing Inches
- Use 66 Square Feet of Floor Space

Aurora Side-To-Side Lateral Mobile Systems increase storage without increasing floor space. When compared to other systems such as lateral or vertical filing cabinets, this modular system can actually reduce storage costs and provide room to store more.

STORE MORE
Side-To-Side can handle all letter and legal size documents, office supplies, books, binders, equipment or virtually anything that must be accessed quickly.

SAFE AND SECURE OVERHEAD ANTI-TIP
The stationary shelving unit and the gliding shelving units are linked securely together to prevent shifting or tipping.

MOVE IT - STOP IT
Durable acetal polymer wheels provide quiet and smooth carriage operation.

A SOUND FOUNDATION
The deck and rail assembly of the Side-To-Side system provide a safe, heavy-duty foundation that can be adjusted for carpeted, wood, concrete or tiled floors.
