

Art-Stor™

The Fine Art of Storage

Art-Stor Applications

- Art Galleries
- Museums
- Corporate Art Collections
- Private Art Collections
- Art Studio Storage
- Academic Art Departments
 - Storage for Student Paintings in Process

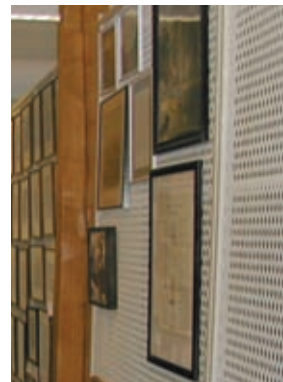

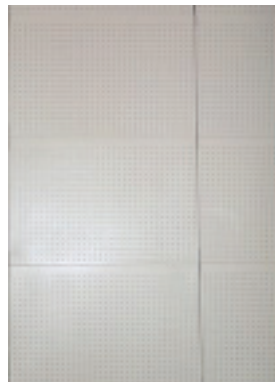

Art-Stor™ from Aurora Storage Products is a unique concept in art storage for museums, libraries, conservators, and educational art departments.

Art-Stor's modular panels allow safe archiving of paintings and drawings with two options for art storage systems: single-sided wall mounted panels, or dual sided panels mounted to mobile carriages.

The perforated panel design uses special hangers to secure and hold all types of framed artwork or artwork in process.

Store Double the Art Work

Unlike traditional mesh systems, our dual-sided carriage mounted panels provide more storage space for art work, while eliminating the risk of damage to valuable collections.

Art-Stor can be used for a variety of applications and when combined with Mobile Shelving can store sculpture and objet d'art in addition to framed paintings and prints.

Art-Stor Perforated Panel

This unique design provides a stable mounting surface for art, preventing a harmful phenomenon called “oil canning.” This problem occurs in mesh art storage systems where the flexible mesh becomes distorted and sags from the weight of the hanging art. Because the art is no longer held closely to the mounting panel, there is a possibility for damage.

Eco-Friendly Finish

Gloss-Tek Powder Coat is eco-friendly with no volatile organic compounds or off-gassing to harm valuable art work.

Choose from 32 beautiful color options to match your décor.
